Art Unit: 1754

Applicant's election with traverse of Group III, claims 20-25 in Paper No. 7 is acknowledged. The traversal is on the ground(s) that there would be no burden on the examiner to search Groups I-IV. This is not found persuasive because the search required for Group I is not required for Group II or III and the search required for Group IV is not required for Group II or III. The search required for Group I is not required for Group IV. As evidence that Groups II and III have attained a separate status in the art and thus a different field of search the reference to Eckert '097, drawn to tantalum oxide, and the reference to Fife '275, drawn to niobium oxide, are cited. This is what is required for insisting on restriction per MPEP 808.02. The examination of the entire application would be a burden on the examiner and thus is properly restrictable per MPEP 803 since the search and examination of the entire application cannot be made without serious burden.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 36-56 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The limitations of each of new claims 36-56 are new matter. Specific support for each limitation needs to be pointed out in the instant specification.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 20-25,36,38-46,48-56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eckert '097.

Eckert suggests the instantly claimed calcined tantalum pentoxide having the instantly claimed surface area and packed bulk density. See the example and claims.

Where the claimed and prior art product(s) are identical or substantially identical, or are produced by identical or substantially identical process(es) the burden of proof is on applicant to establish that the prior art product(s) do not necessarily or inherently possess the characteristics of the instantly claimed product(s), see *In re Best*, 195 USPQ 430. It is also noted that size of an article is not matter of invention, *In re Rose*, 105 USPQ 237.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed.

Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 20-25, 36-56 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15, 17 of U.S. Patent No. 6,338,832. Although the conflicting claims are not identical, they are not patentably distinct from each other because they overlap in scope of subject matter claimed. It would have been obvious to one skilled in the art to recover the product from the taught process, which product is the same as that instantly claimed, even though not identically described.
